

Pricing Display Changes in Worldspan

OVERVIEW

In February 2009 updated Worldspan Pricing displays will premier to encompass the addition of new pricing data and realign existing information for an easier to read screen display.

The upcoming Pricing Display changes will be reflected in the following fares products; Money Saver and Carrier Specific Fare Displays (4F), Itinerary Pricing (4P), Low Fare Finder (4PLF), Power Pricing (4PLI) and Power Shopper (\$P).

CUSTOMER BENEFIT

- New Pricing Displays offer an easy to read format
- Groups fare data, fare basis code, taxes and fee information by passenger type
- Creates an alignment of all fare basis codes
- Introduces new ticket price and grand total summary information
- Supports implementation of future expansion to 99 Taxes, and ATPCO Ticketing Fees(OB) and Optional Services (OC)

DETAIL AND CUSTOMER EXAMPLES

Pricing Display:

A new pricing summary will replace the current pricing summary in all pricing displays. The pricing summary will indicate the ticket base, equivalent base (when applicable), tax total and total per PTC and for all PTCS.

Example with equivalent pricing

TICKET	BASE	GBP	EV	HKD	TX/FEE	HKD	TKT	TTL	HKD
ADT01	233.00		3030.00		680.00		3710.00		
INF01	23.30		303.00		560.00		863.00		
*TTL	256.30		3333.00		1240.00		4573.00		

The Fare Basis Code will display in its own line above the ladder. When more than one fare basis code applies they will be separated with a '*'. When it is necessary to go to the next line, the FBC will not be truncated. The first FBC of the new line will align with the first FBC above.

FBC	ADT	J1FL*MOWBMI*BHFEEA/123*D2RTBA2*YRWTEST*AGLOB34*
		YRWTEST3/1234*CRWJ40
ADT	LON	BA MAN 154.00BD LON 79.00GBP233.00END BA
		TX 40.02GB 28.61UB 38.00YQ

A new TX line will display below the ladder and will include all applicable taxes and fees (YQ/YR).

Example with more than three taxes
