

# New Customer Resources

## Travelport uAPI Test Tool

Eddie Hung  
Mar 2017

# Travelport uAPI Test Tool Download

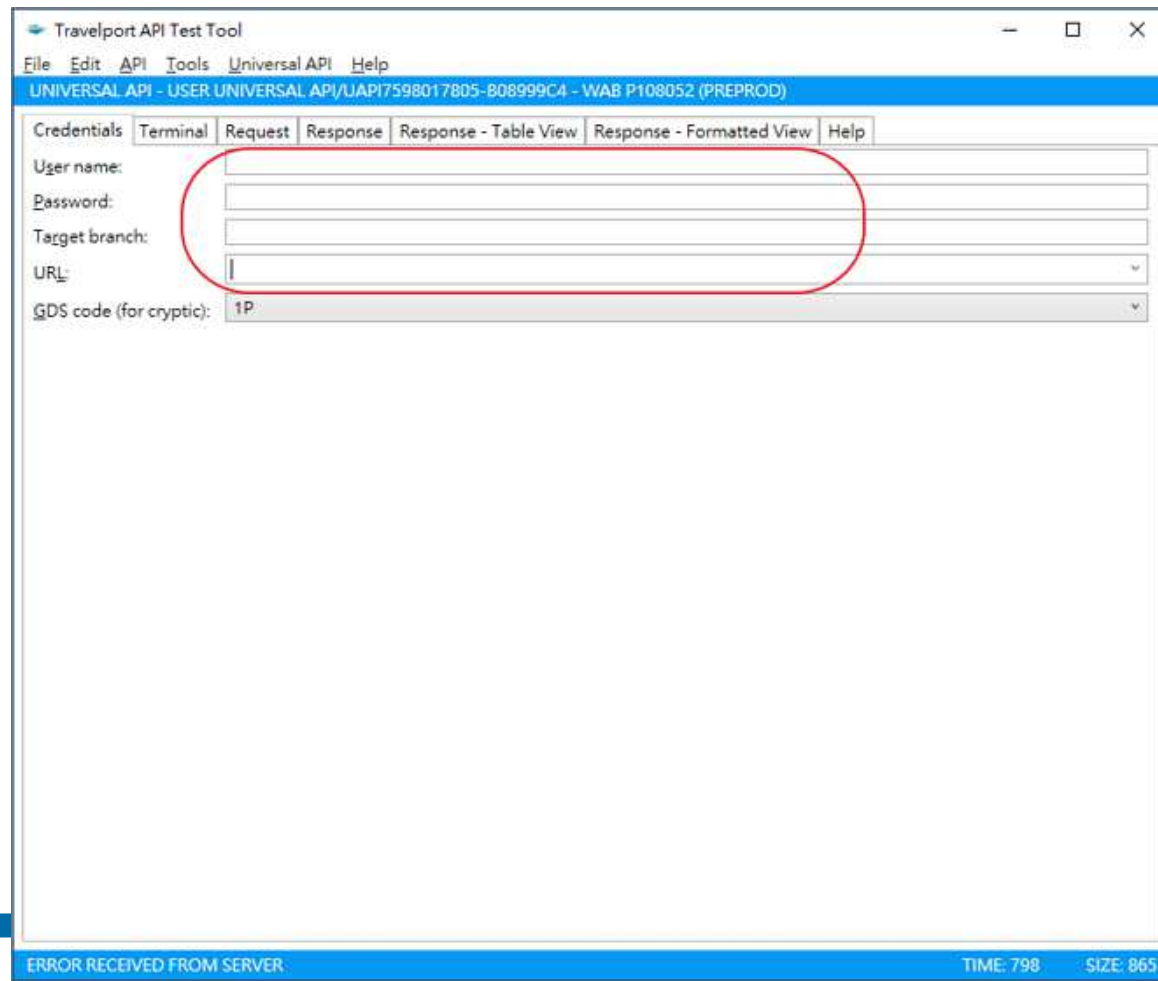

1. Go to the following URL:  
<https://developer.travelport.com/app/developer-network/getting-started-uapi>
2. Download and install "Universal API Test Tool"

The screenshot displays a developer network page with three main sections: Quick start, Sandbox, and Resources. The 'Quick start' section contains three steps: 01 Request trial credentials for Sandbox, 02 Download WSDLs and schemas, and 03 Watch the Travelport Codemaster videos. The 'Sandbox' section contains four steps: 01 How do I send my first request, 02 Show me a sample request and response, 03 Ping Universal API to test your connectivity, and 04 Choose the correct endpoint for your testing. The 'Resources' section contains three items: New to the travel industry? COMING SOON, Universal API online help, and Tutorials and code samples in different languages. The 'Universal API test tool' link in the Resources section is highlighted with a red circle.

Section	Item	Description	Icon
Quick start	01	Request trial credentials for Sandbox	Link
	02	Download WSDLs and schemas	Link
	03	Watch the Travelport Codemaster videos	Play
Sandbox	01	How do I send my first request	Info
	02	Show me a sample request and response	Info
	03	Ping Universal API to test your connectivity	Info
	04	Choose the correct endpoint for your testing	Info
Resources		New to the travel industry? COMING SOON	Document
		Universal API online help	Info
		Tutorials and code samples in different languages	Link
	Universal API test tool	Download	

# Start to Use uAPI Test Tool

- Input the required information

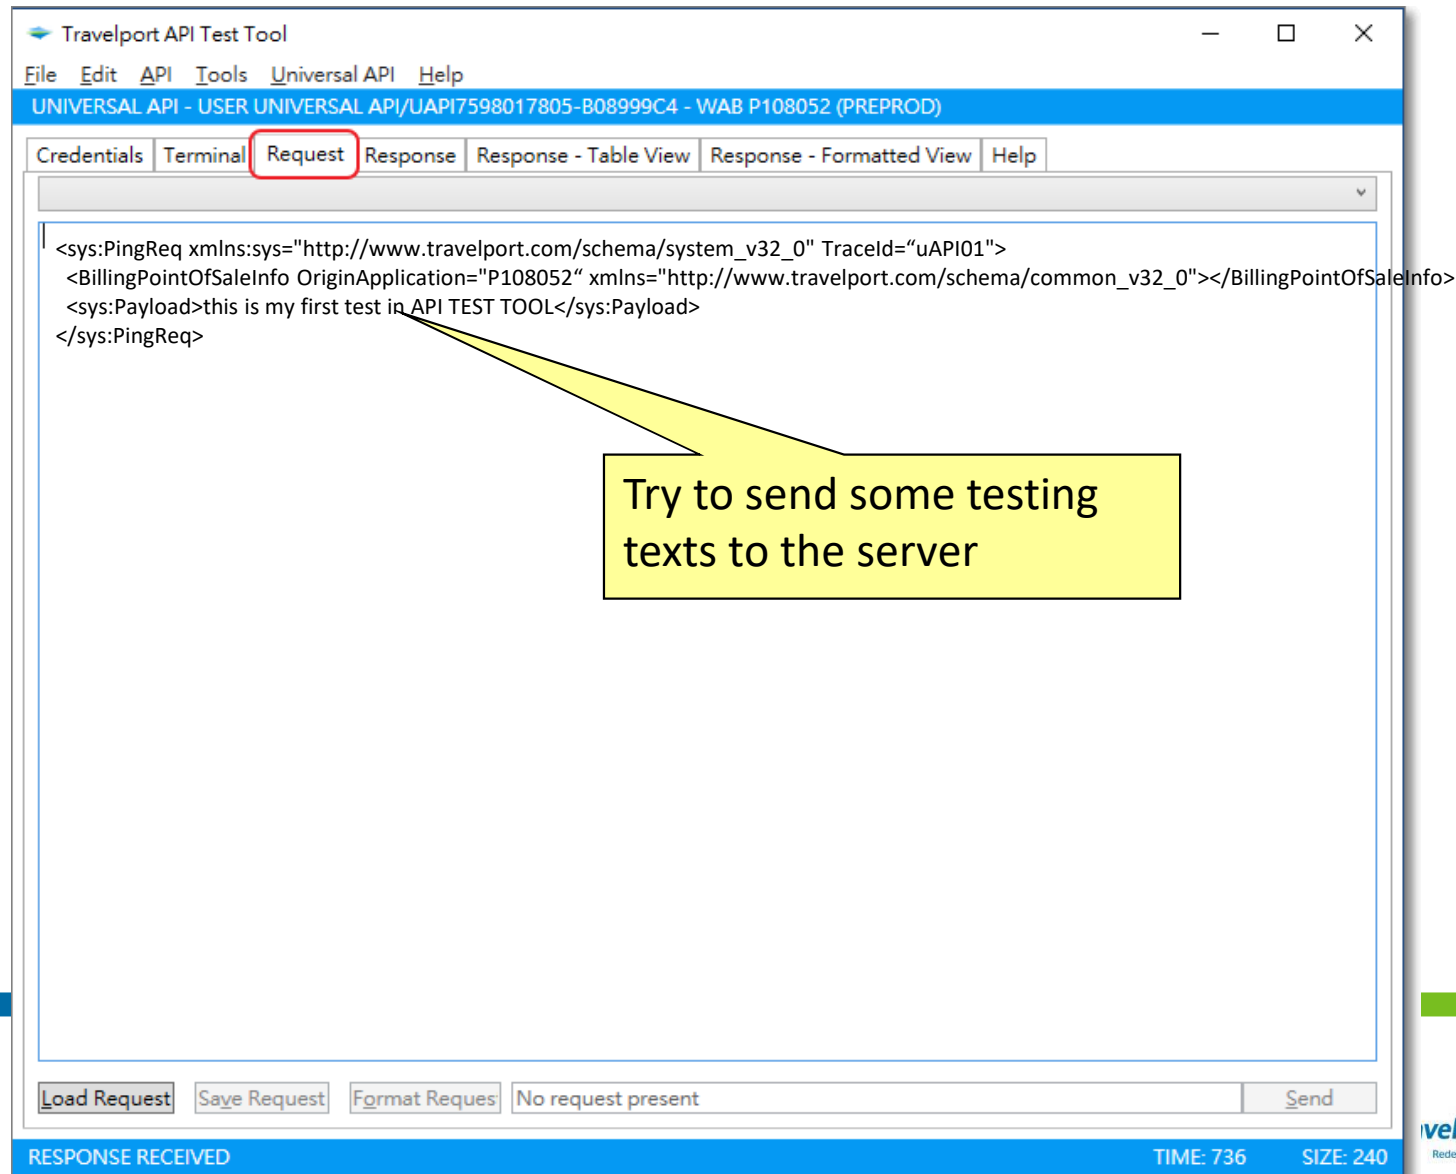

The screenshot shows the 'Travelport API Test Tool' application window. The title bar reads 'Travelport API Test Tool'. The menu bar includes 'File', 'Edit', 'API', 'Tools', 'Universal API', and 'Help'. The main window title is 'UNIVERSAL\_API - USER UNIVERSAL\_API/UAPI7598017805-808999C4 - WAB P108052 (PREPROD)'. Below the title bar, there are tabs for 'Credentials', 'Terminal', 'Request', 'Response', 'Response - Table View', 'Response - Formatted View', and 'Help'. The 'Credentials' tab is active, showing a form with the following fields:

- User name:
- Password:
- Target branch:
- URL:
- GDS code (for cryptic): 1P

A red oval highlights the 'User name', 'Password', and 'Target branch' fields. At the bottom of the window, a status bar displays 'ERROR RECEIVED FROM SERVER.' on the left, 'TIME: 798' in the center, and 'SIZE: 865' on the right.

# Try to Send Your First XML Request

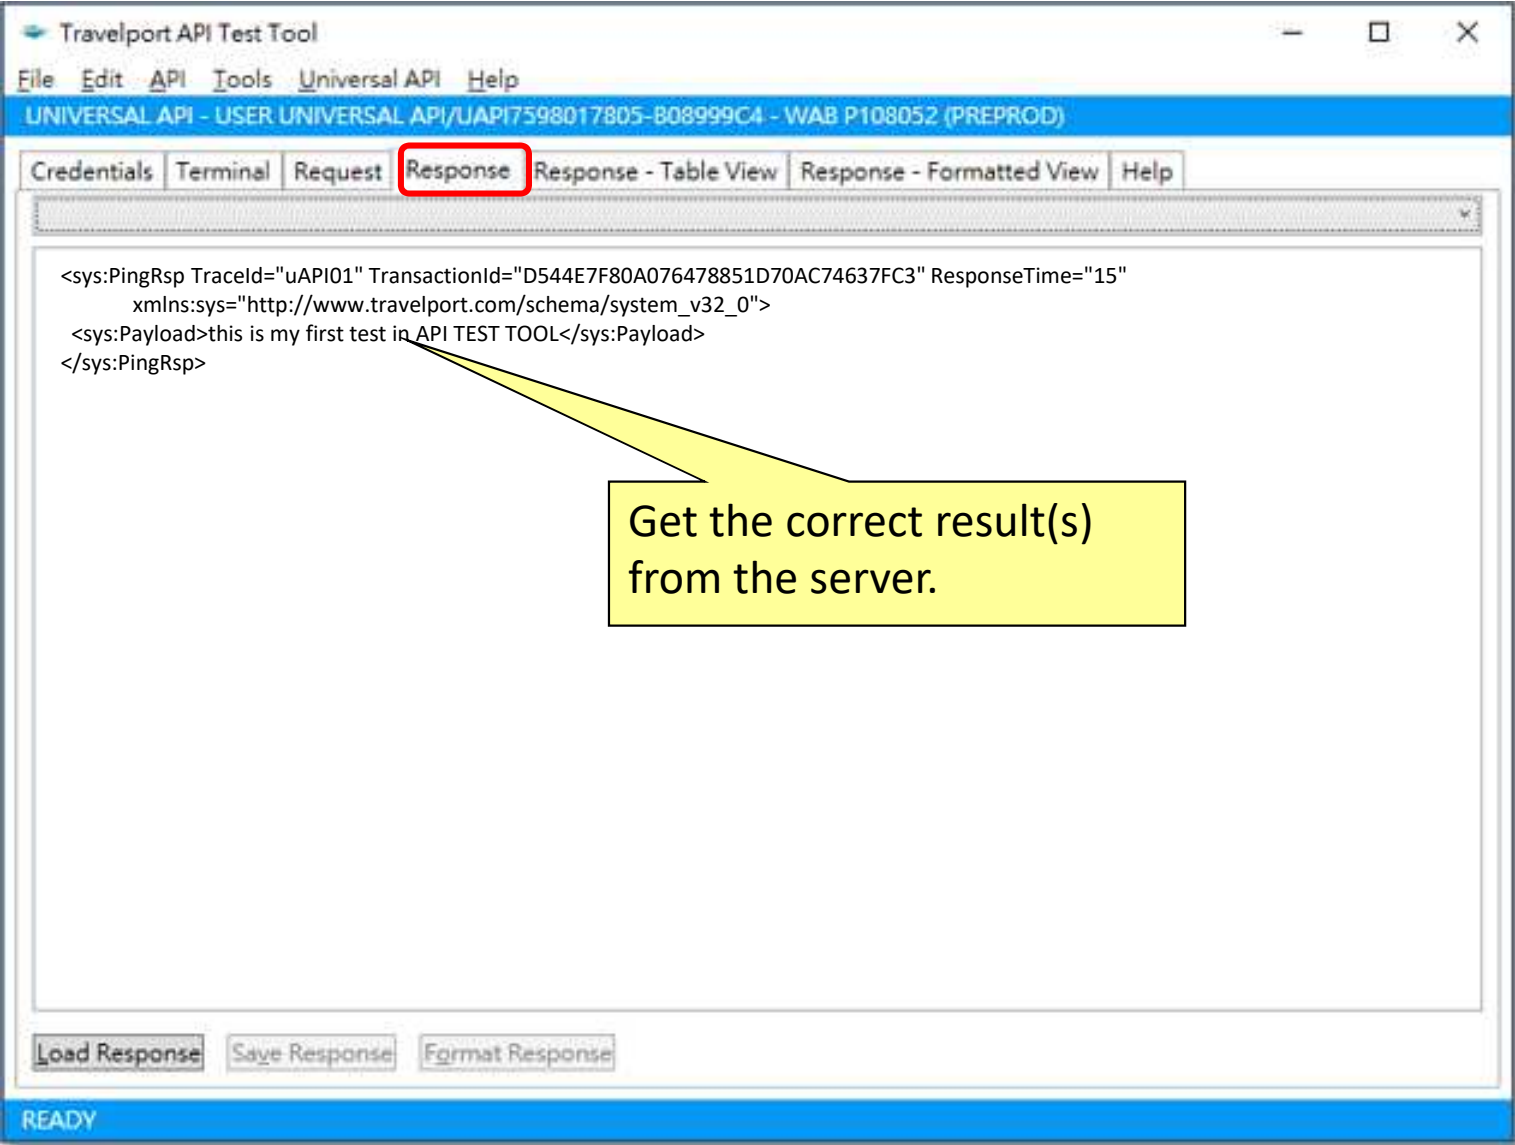

The screenshot shows the 'Travelport API Test Tool' window. The title bar reads 'UNIVERSAL API - USER UNIVERSAL API/UAPI7598017805-B08999C4 - WAB P108052 (PREPROD)'. The 'Request' tab is selected and highlighted with a red box. The XML request text is as follows:

```
<sys:PingReq xmlns:sys="http://www.travelport.com/schema/system_v32_0" TracId="uAPI01">  
  <BillingPointOfSaleInfo OriginApplication="P108052" xmlns="http://www.travelport.com/schema/common_v32_0"></BillingPointOfSaleInfo>  
  <sys:Payload>this is my first test in API TEST TOOL</sys:Payload>  
</sys:PingReq>
```

A yellow callout box with a black border points to the XML text, containing the text: "Try to send some testing texts to the server".

At the bottom of the window, there are buttons for 'Load Request', 'Save Request', 'Format Request', 'No request present', and 'Send'. The status bar at the very bottom shows 'RESPONSE RECEIVED', 'TIME: 736', and 'SIZE: 240'.
